Career Experience

Web Developer

HERE (formerly Nokia/Navteq)

July 2014 - Present

I develop and maintain e-commerce sites and functionality using HTML5, CSS, JavaScript/JQuery, and proprietary InterShop Markup Language for strategic B2B partners while strictly adhering to design guidelines and branding requirements. Some partners include Ford, Honda/Acura, GM, and Mercedes.

Other responsibilities include the creation and updating of front end team documentation, training other team members on development procedures, and mentoring junior developers on development stack.

Web Developer

Apartment People

March 2011 to March 2014

I was in charge of developing and maintaining both the intranet and client facing website on Windows IIS with classic ASP, and a Linux, Apache, MySQL and PHP stack. I wireframed, designed and developed the client facing website using all modern standards and using a Bootstrap base.

I was charged with prototyping new solutions and developing them to use in the day to day operations of the company, including the overhauling of the database migration from a SQL 2000 database to MySQL database, a new online appointment and management system, and an automated email system for use during application process. I also acted as a technical liaison to vendors and business partners.

Lead Photographer

Apartment People

March 2008 to March 2011

As the Lead photographer, I was in charge of creating photographic images as well as developing the guidelines, procedures and technical workflows for the department and leading a team of photographers. I was involved in the recruitment and hiring of staff photographers, as well as mentoring interns.

Guest Services

Apartment People

October 2005 to January 2011

In this role I helped guide customers in the process of renting an apartment or condo in Chicago. I helped maintain and distribute the inventory of keys of thousands of properties.

Computer Operator

ADP/Probusiness

July 2004 to August 2005

I performed QA on printed payroll documents in a high volume, deadline-driven environment. I also operated and performed daily maintenance of printers.

Aviation Structural Mechanic 2nd Class

U.S. Navy

July 2000 to July 2004

Between 2000 and 2002, I was one of the leading members of a small shop maintaining aerial refueling stores for a training squadron of S3 Vikings. Some of the other responsibilities were scheduling of personnel shifts, and editing and updating training manuals.

At my next command, between 2002 and 2004, I was part of a maintenance team of 16 navy personnel. I performed scheduled and unscheduled maintenance of a squadron F/A-18C aircraft, performed troubleshooting duties in a fast paced, high-risk flight deck operations. Other duties included overseeing training of all team members to maintain a high proficiency of all systems, support equipment, and procedures.

Systems Administrator

Silicon Valley A2Z

December 1999 to July 2000

In this job I acted as a system and network administrator of a small windows and linux network. I designed and developed the company website.

IT Administrator

Panama Discovery Tours

October 1998 to November 1999

I was in charge of performing system and network maintenance and administration. I updated and maintained the company website.

Other responsibilities included customer service, tour guide, and a confidence course facilitator as well as photographer.
